Subject: BP Whiting Spill Update

The U.S. Environmental Protection Agency and the U.S. Coast Guard were on site yesterday to oversee day eight of cleanup operations following the oil spill into Lake Michigan that BP reported on March 24.

All containment boom along the beach has been removed except for boom encircling the BP outfall. Sunday, 35 survey points on the bottom of the cove were evaluated for submerged oil. Currently, there is no indication of any submerged oil in the surveyed area of Lake Michigan.

Please note that EPA has been posting updates and photos at this webpage:
